PROFILE

UX/UI and Product Designer with 6 years of experience designing complex interfaces for SaaS, e-commerce, healthcare and HR tech. I work AI-native: research, PRDs, visual exploration, mockups and prototypes run through agents in my IDE, so I take an idea to a working prototype on my own.

CORE COMPETENCIES

SKILLS: Product design, UX/UI, UX research, prototyping, design systems, web design, art direction, UX audits, motion design, brand identity, pitch decks, project management

TOOLS: Figma, FigJam, After Effects, Photoshop, Illustrator, InDesign, HTML, CSS, Webflow, WordPress, Vercel, Jira, Notion, Obsidian, Google Analytics, Hotjar, Microsoft Clarity

AI TOOLS: Claude Code, Antigravity, Krea, Magnific, Midjourney

EXPERIENCE

Karts Design, UX/UI & Product Designer — Jun 2025 – Present

Research and end-to-end design: web and mobile products, websites and design systems

- Led the redesign of Bondata, an HR analytics platform for HR leads and managers in Finland, around getting from a survey result to an action: filters that apply as they are set, objectives that carry the result behind them, and ~40 views grouped into sections with search.
- Made AI-generated summaries in Bondata read as AI before the first word, and separated trend direction from good or bad in the charts, so a rising harassment score doesn't read as progress.
- Led art direction and the design system for Evoke v2, a Polish AI companion for difficult emotions (iOS, Android): an interface that never reacts to what the user says, because in mental health the wrong tone is a safety problem.
- Took Your Vet (Twój Weterynarz), a two-sided vet booking marketplace, from competitive analysis to launch. Built it around the gap three competitors shared: a public, searchable directory that works before your clinic joins.
- Made rescheduling the default when plans change, so clinics keep the slot, and reworked the clinic calendar with the staff who run it.
- Pitched my work to clients and defended the decisions behind it.

Independent, Freelance Designer (self-employed) — May 2021 – Present

Direct client work alongside full-time roles, mostly through Upwork

- Consulted another company on the product design of their app, advising their team on UX decisions.
- Designed responsive websites where I own the user flow as much as the visuals.
- Built the brand system around each site: logo, palette, typography.

Naima sp. z o.o., Web/Graphic Designer (Łódź) — Nov 2020 – Feb 2025

Four years in-house: websites, newsletters, print and digital material, visual identities

- Designed and built websites and newsletters, working on the path a person takes through a page as much as on how it looks.
- Produced the print and digital material around them: brochures, flyers, maps, banners.
- Developed visual identities and kept them consistent across channels.

SIDE PROJECTS

Dishcover, a recipe app with step-by-step recipes and a hands-free cooking mode (iOS, Android). Designed solo, end to end: research, user flow and 100+ screens in light and dark, in 3.5 months. 50K+ views and 2.3K appreciations on Behance; a developer found it there and is building it.

wlad.design, my portfolio site. Designed in Figma and built with Claude Code as static HTML, CSS and JS, with a WebGL particle field and GSAP motion.

EDUCATION

University of Humanities and Economics in Łódź (AHE) 2017 – 2020

Visual Communication & Multimedia

COURSES

AI Native - Pixel Perfect, 2026

UX/UI Design - Uprock School, 2025

Google UX Design - Coursera, 2023

LANGUAGES

Polish (C2), Russian (C2), Belarusian (C1), English (B2)
